The Power of Silver

Exclusively from Deb

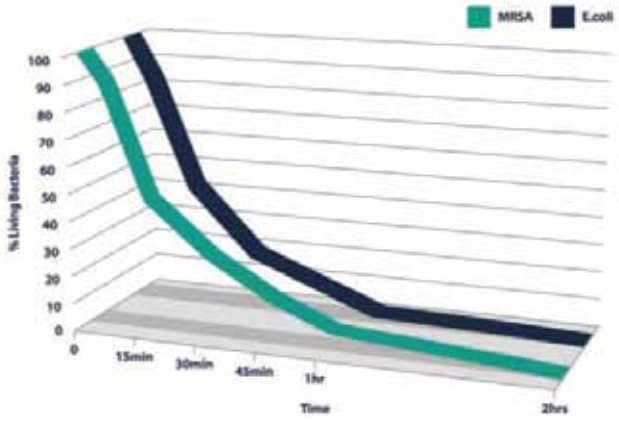
BioCote® silver ion technology has been incorporated into all Deb Global Range and Touch Free dispensers.

BioCote® silver ion technology is:

Effective: Reduces bacteria, mould and fungi on the surface of BioCote® treated Deb dispensers within as little as 2 hours and achieves up to 99.99% reduction over a 24-hour period*.

Long-Lasting: It maintains its antimicrobial performance for the lifetime of the dispenser; will not wear off, wash off or leach out.

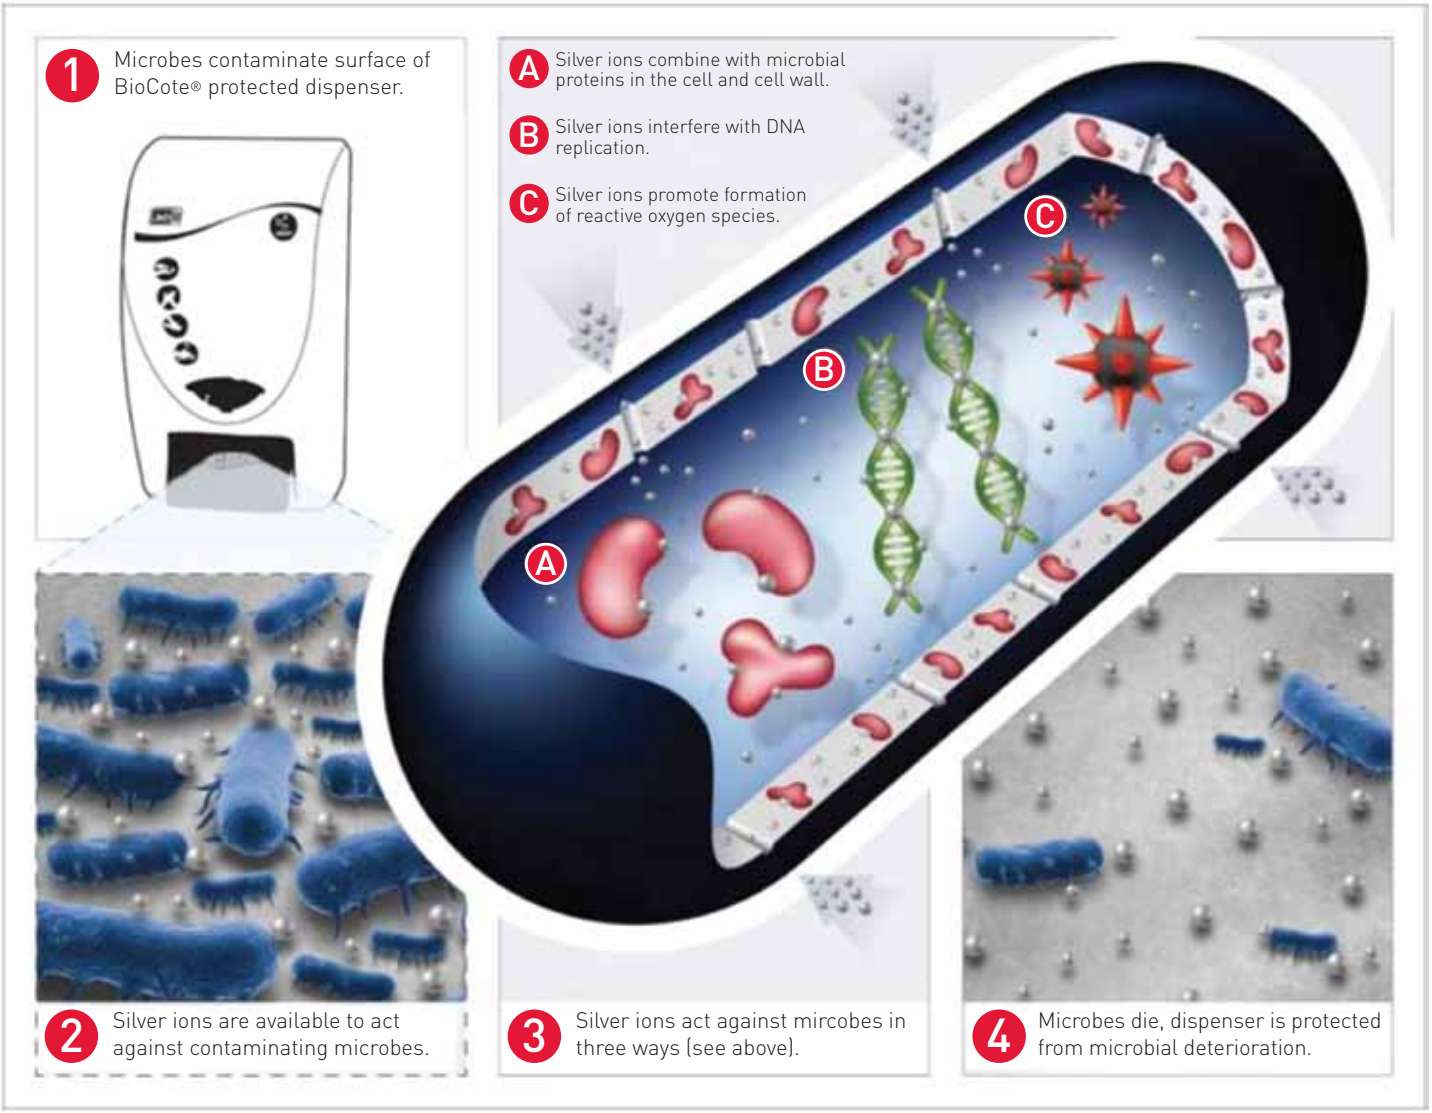
Safe: Silver is regarded as non-toxic and is a safe and natural alternative to synthetic, organic antimicrobials like Triclosan.



*Efficacy is independently validated by ISO methods.

Scientific study carried out proves BioCote® treated Deb dispensers reduce high level of bacteria in comparison to an untreated Deb dispenser

How does Silver technology work?



Deb Skin Care dispensers containing BioCote® antimicrobial technology can be expected to harbour lower levels of bacterial contamination
